SUMMARY

Intricate. Unorthodox. Moldable.

HIGHLIGHTS

Games Shipped

- Prodigy Education - Math - Live Service
- Gears of War: E-Day
- UFC 3
- NHL 2020 -> 2023

Key Metrics

- QA Ownership of Prodigy Education's - Hard Mode - Math
- Revenue +11% | Conversion +8.6%
- ASP +4.8% | OTP revenue +11%
- % of users making purchases +6.5%.

AREAS OF EXPERTISE

• Xbox X/S/One • Playstation 4/5 • PC/ Steam • Meta Quest 2/3 • Unity • Unreal Engine • Godot • Test Automation • Regression Testing • Test Planning • Cross-Functional Collaboration • Documentation • Agile • Jira • Performance Testing • Functional Testing • Development Integration • API Testing

EXPERIENCE

QA Lead — Prodigy Education (Mass Layoff) | **Feb 2025 - Jan 2026**

- Strengthened testing efficiencies by designing multiple tools currently utilized by QA developers and stakeholders.
- Strengthened team-wide playtests by managing accounts and addressing feedback to enhance product quality and user engagement.
- Ensured implementation of all tickets and features in a bi-weekly release cycle.
- Completed Prodigy's Q4 New Manager Training., strengthening leadership, coaching, and cross-team communication skills.
- Optimized the assignment of hundreds of test cases to contract teams, enhancing coverage and streamlining testing processes for improved efficiency.
- Crafted and updated Confluence pages to define and communicate company standards effectively.
- Organized test runs and resolved roadblocks with a team of 10 Contract QA professionals.
- Debugged commands and validated process flows in partnership with the automation team to enhance system functionality.
- Automated communication and data compilation processes by integrating extensions with JIRA and Sheets, enhancing workflow efficiency and accuracy.

QA VR Biomedical Specialist — PrecisionOS | **Oct 2023 - Apr 2024**

- Monitored modules in UE4 and UE5 to uphold engine quality through thorough smoke and health checks.
- Completed Hosted VR sessions globally for training surgeons and clients., strengthening leadership, coaching, and cross-team communication skills.
- Standardized feedback implementation for UE5 Blueprints to enhance functionality and user experience.
- Launched Proof of Concepts (PoCs) for Anatomy, Trauma, and Arthroscope modules to assess functionality and support development efforts.
- Tested module health checks and communicated results to stakeholders to facilitate informed decision-making.
- Completed Created and implemented test plans in the test case tracking program Tuskr., strengthening leadership, coaching, and cross-team communication skills.
- Integrated with stakeholders such as designers, engineers, and product owners to align on project requirements and enhance collaboration throughout the development process.

Software Test Engineer 3 — Microsoft / Ascendion | **May 2023 - Oct 2023**

- Communicated new features effectively to the QA and Development Support teams, enhancing collaboration and understanding of project updates.
- Triaged smoke and health checks for tools and the team's engine, maintaining operational integrity in UE5 and MS tools.
- Evaluated code within UE5 and documented bugs to enhance software quality and performance.
- Drafted user stories and coordinated with developers to ensure alignment on project requirements.
- Spearheaded JIRA migration to JIRA Cloud as the sole QA, developing comprehensive test cases to achieve quality parity throughout the transition.
- Updated Confluence pages to reflect new features and tools, maintaining accurate documentation for team access and reference.

- Supported the Automation team to boost productivity and optimize quality assurance workflows.
- Developed test plans for the Automation team to follow for automated smoke checks.
- Resolved issues identified in automation results related to engines, tools, and scripts to support quality assurance efforts.
- Resolved engine health issues by documenting critical problems and tracking their resolution to maintain operational reliability.
- Introduced innovative strategies that enhanced operational efficiency and boosted overall productivity.

Dev Support Tier 4/QA Lead — EA/Keywords Studios (Layoff) |

May 2019 - Sept 2022

- Guided the use of tools including JIRA, Testrail, Excel, and PowerBI to optimize quality assurance processes and improve automation workflows across multiple projects.
- Coached new hires to enhance their skills and support their professional development within the organization.
- Collaborated with Team Leads and participated in the hiring and firing process.
- Coordinated and led a team of 8-12 testers from Romania.
- Built new player features, skills, stats, art, and rarity scales in collaboration with designers to enhance user engagement and gameplay experience.
- Completed Served as the POC for Onboarding and training, Health Checks, Automation, Work Orders/hours and coordinated daily tasks and priorities for the EAV team., strengthening leadership, coaching, and cross-team communication skills.
- Coordinated and communicated with Directors, Managers, Designers, Engineers, Area Leads, and Quality Designers.
- Advocated for quality initiatives in Bug Triage meetings with Directors, Managers, Designers, Engineers, Area Leads, and Quality Designers to enhance defect resolution and process alignment.
- Contributed to team scope definition, estimated MDs/TFCs, and assigned tasks to enhance workflow efficiency and accountability.
